# Example Identity Maps

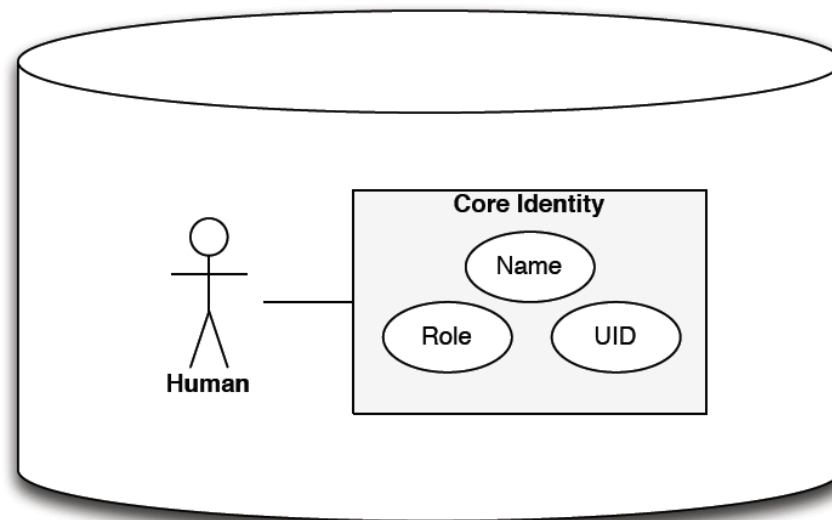

Mark Dixon's Identity Map of 2005:  
[http://blogs.oracle.com/identity/entry/identity\\_map1](http://blogs.oracle.com/identity/entry/identity_map1)

Greg Nadeau's Identity Grid of 2010:  
The State Core Model v2o for Educational Records and Longitudinal Studies

# A Concise Model for “Core Identity”

Source Point: Name, Rank and Serial Number

Domain of Identity

---

Above Role is for Core ID Domain, eg “Free Citizen of X”, “Subject of X Crown”, “Member of X Tribe” etc.  
Binding of Core ID to Additional Identities or Attributes Can be Via UID (voting), Pseudonym or Session ID’s.

Extrapolation: One Core ID per Person. Many Attributes, Roles and Relationships Exist Per Core ID, in Additional domains of identity, e.g. “work identity domain”, “consumer identity domain”, etc.
